MEMORANDUM FOR

Commander, First Region (ROTC), U.S. Army Cadet Command,
(ATOA-HS), Fort Bragg, NC 28307-5000
Commander, Second Region (ROTC), U.S. Army Cadet Command,
(ATOB-HS), Fort Knox, KY 40121-5610
Commander, Fourth Region (ROTC), U.S. Army Cadet Command,
(ATOD-HS), Fort Lewis, WA 98433-7100

SUBJECT: National Science Center (NSC) Support of JROTC

1. NSC has begun planning for JROTC Outreach Program participation in our Junior ROTC summer camps for 2003. All camp commanders will receive a memorandum from NSC requesting preliminary information concerning their camps.
2. I totally support NSC's JROTC math and science program and its inclusion in the JROTC curriculum. You will have the option to conduct their math and science modules at summer camps or in classrooms.
3. Camp commanders who use NSC's modules at summer camps should ensure the modules are not only included in camp schedules, but also in cadets' camp evaluation/award requirements. These modules add a significant educational dimension for camp participants. The growing necessity to increase academics in JROTC, along with the positive feedback from camps where the modules were properly presented, led to the decision to include the math and science modules as a mandatory part of the JROTC camp experience.
4. I encourage Regions to contact camp commanders and instructors and have them work closely with NSC to support whichever option chosen, and provide them information requested.

FOR THE COMMANDER:

RODNEY A. PHILLIPS
Colonel, GS
Chief of Staff
